Subject: **Indian Point 3 Nuclear Power Plant**
Docket No. 50-286
Proposed Changes to Technical Specifications
Regarding Figures 3.10-2, 3.10-4, and 4.2-1

Dear Sir:

This application for amendment to the Indian Point 3 Technical Specifications proposes several administrative changes regarding the subject figures. Technical Specification Amendment 103 relocated Figures 3.10-2 and 3.10-4 to the Core Operating Limits Report (COLR), and Amendment 57 deleted Figure 4.2-1. Because of these previous amendments, the subject figures and references to them should not be contained in the Indian Point 3 Technical Specifications. "Deleted" figure pages and an updated "List of Figures" for the Indian Point 3 Technical Specifications are being provided to clarify the status of these figures.

The proposed technical specification changes are contained in Attachment I to the Application for Amendment enclosed with this letter, and the associated Safety Evaluation is provided as Attachment II. Commitments associated with the proposed changes are enclosed as Attachment III.

A copy of this application and the associated attachments are being provided to the designated New York State official as required by 10 CFR 50.91.

If you have any questions, please contact Mr. P. Kokolakis.

Very truly yours,

A handwritten signature of Ralph E. Beedle in dark ink.

Ralph E. Beedle
