NUCLEAR REGULATORY COMMISSION

In the Matter of)
POWER AUTHORITY OF THE STATE OF NEW YORK)
Indian Point 3 Nuclear Power Plant)

Docket No. 50-286

APPLICATION FOR AMENDMENT TO OPERATING LICENSE

Pursuant to Section 50.90 of the regulations of the Nuclear Regulatory Commission (NRC), the Power Authority of the State of New York, as holder of Facility Operating License No. DPR-64, hereby applies for an Amendment to the Technical Specifications contained in Appendix A of this license.

This application for amendment to the Indian Point Unit 3 (IP3) Technical Specifications proposes to revise Section 3.3 of Appendix A of the Operating License. The proposed revision to Technical Specification 3.3.D.1.a would allow for the disconnection of those portions of the Weld Channel Pressurization System that become inoperable and are not practicably accessible for repair. This application also describes revisions to the bases in Sections 3.3 and 4.4 that reflect the disconnection of portions of the Weld Channel Pressurization System. Additionally, administrative changes to Technical Specifications 3.3.B.3.b and 3.3.E.3.b and to the bases of Section 3.3 are described in this application.

The proposed changes to the technical specifications are included as Attachment I to this application. The Safety Evaluation is included as Attachment II.
