Subject: **Indian Point 3 Nuclear Power Plant**
Docket No. 50-286
Proposed Changes to Technical Specifications
Regarding Plant Operating Review Committee (PORC)
Membership and Review Responsibilities

Dear Sir:

This application for an amendment to the Indian Point 3 Technical Specifications proposes to alter the Plant Operating Review Committee's (PORC's) membership requirements and to delegate a portion of PORC's procedure review responsibilities for nuclear safety related procedures and procedure changes to the line organizations. PORC will continue to perform safety reviews associated with procedures that are of safety significance. The proposed procedure review and approval process will alter the scope of the PORC review function to be more appropriate for that of a safety oversight committee by reducing the administrative burden on PORC.

In addition, a change is also being proposed to implement the guidance of Generic Letter 93-07. This Generic Letter discusses the removal of the review and audit responsibilities for the Emergency and Security Plans from the Technical Specifications.

The proposed Technical Specification changes are contained in Attachment I to the Application for Amendment enclosed with this letter, and the associated Safety Evaluation is provided as Attachment II. The Authority's commitments associated with this application are presented in Attachment III.

A copy of this application and the associated attachments are being submitted to the designated New York State official as required by 10 CFR 50.91.
