NEW YORK POWER AUTHORITY	7	Docket No. 50-286
ndian Point 3 Nuclear Power Plant	Á	

APPLICATION FOR AMENDMENT TO THE OPERATING LICENSE

Pursuant to Section 50.90 of the regulations of the Nuclear Regulatory Commission, the New York Power Authority, as holder of Facility Operating License No. DPR-64, hereby applies for an amendment to the Technical Specifications contained in Appendix A of this license.

This application for amendment to the Indian Point 3 Technical Specifications proposes to remove the Boron Injection Tank (BIT) bypass valves from the list of containment isolation valves in Tables 3.6-1 and 4.4-1. The valves are located in the Safety Injection System, and a modification will be performed to remove the valves and seal the associated penetration pathway to maintain containment integrity. Additionally, the application proposes to add the BIT outlet valves to the list of containment isolation valves in Table 3.6-1 to accommodate testing of the Safety Injection pumps.

The proposed changes to the Technical Specifications are included as Attachment I to this application. The Safety Evaluation is included as Attachment II.
