

BEFORE THE UNITED STATES
NUCLEAR REGULATORY COMMISSION

In the matter of)
POWER AUTHORITY OF THE STATE OF NEW YORK) Docket No. 50-286
Indian Point 3 Nuclear Power Plant)

APPLICATION FOR AMENDMENT TO OPERATING LICENSE

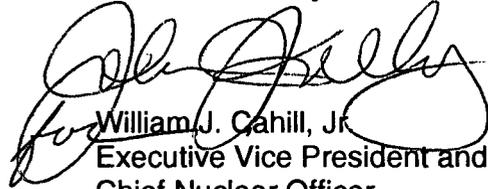

The New York Power Authority supplements a request for an amendment to the Technical Specifications contained in Appendix A to Facility Operating License DPR-64 and to the Facility Operating License DPR-64 for the Indian Point 3 Nuclear Power Plant. This application is filed in accordance with Section 10 CFR 50.90 of the Nuclear Regulatory Commission's regulation.

This supplement to the proposed change to the Technical Specifications (TS) adds the Fire Protection Program implementation as additional procedures in Indian Point 3 TS Section 6.8.1 - Procedures. In addition, the change to the Facility Operating License incorrectly listed an SER from May 27, 1988. This reference is being deleted. Also an additional reference for the Amendment No. 146 (Reference 3) SER has been added. The revised proposed change to the Facility Operating License incorporates both of the above changes.

This proposed amendment has been developed in accordance with the guidance contained in NRC Generic Letters 86-10 and 88-12, and is consistent with NRC and industry efforts to simplify the Technical Specifications.

The additional Technical Specification pages are included as Attachment I, and the proposed change to the Operating License is included in Attachment II. The Safety Evaluation is included as Attachment III.

Power Authority of the State of New York

William J. Cahill, Jr.
Executive Vice President and
Chief Nuclear Officer
Nuclear Generation
