"Proposed Changes to the Technical Specifications Regarding
Administrative Controls", dated September 16, 1994.

Dear Sir:

The Authority is supplementing an application for amendment to the James A. FitzPatrick and Indian Point 3 Technical Specifications, in response to a question from the NRC. The original application (Reference 1) proposes to make changes to Section 6.0, "Administrative Controls" to reflect a reorganization of the New York Power Authority.

This supplement clarifies the minimum number of Safety Review Committee members and the affect this amendment has on quorum requirements. Revisions are indicated by change bars on the attached pages. No changes to the Technical Specification pages themselves are necessary and the conclusion of no significant hazards considerations is not affected.

If you have any questions, please contact Ms. Charlene Faison.

Very truly yours,
