Subject: Indian Point 3 Nuclear Power Plant  
Docket No. 50-286  
**Supplement to the Proposed Changes to Technical  
Specifications Regarding Plant Operating Review  
Committee (PORC) Membership and Review Responsibilities**

Reference: NYPA letter, W. A. Josiger to the NRC (IPN-94-078), dated  
June 29, 1994, "Proposed Changes to Technical Specifications Regarding Plant  
Operating Review Committee (PORC) Membership and Review  
Responsibilities."

Dear Sir:

This letter submits a supplement to the referenced letter regarding proposed changes to the Indian Point 3 Technical Specifications concerning the Plant Operating Review Committee (PORC) membership and review responsibilities. The change being proposed concerns the procedure review and approval process, specifically the qualifications for the designated technical reviewers. The proposed change modifies the requirements for designated technical reviewers by excluding Sections 4.3.2 and 4.5 of Section 4 of ANSI N18.1-1971 from the list of applicable positions. Individuals whose positions are described in these two sections may qualify as designated technical reviewers provided they meet the qualifications described in the other portions of ANSI N18.1-1971, Section 4. Technical Specification page 6-6, contained in Attachment I, should be used in place of the one submitted in the referenced letter.

The exclusion of these two sections does not change the evaluation of significant hazards considerations submitted with the original Technical Specification Amendment request.
