SUBJECT: Indian Point 3 Nuclear Power Plant  
Docket No. 50-286  
License No. DPR-64  
**Proposed Change to the Technical Specifications Regarding  
Maximum Allowable Leakage from Residual Heat Removal and  
Safety Injection Systems Outside Containment**

Dear Sir:

This application for amendment to the Indian Point 3 Technical Specifications proposes to amend Sections 3.3 and 4.4 and the Bases of Appendix A of the Operating License. The proposed change would add a Limiting Condition for Operation for the maximum allowable leakage from the Residual Heat Removal (RHR) and Safety Injection (SI) systems outside containment, and revise the maximum allowable leakage from 2 gallons per hour (gph) to 1.09 gph. This Technical Specification change would ensure that the control room habitability design basis for post accident leakage outside containment is met.

The signed original of the Application for Amendment to the Operating License is enclosed for filing. Attachments I and II of this application contain the proposed change to the Technical Specifications and the associated safety evaluation.

In accordance with 10 CFR 50.91, a copy of this application and the associated attachments are being submitted to the designated New York State official.

There are no new commitments associated with this letter. If you have any questions regarding this letter, please contact Mr. K. Peters.

Very truly yours,

A handwritten signature in cursive script, appearing to read 'William J. Cahill, Jr.', written in dark ink.
