

BEFORE THE UNITED STATES  
NUCLEAR REGULATORY COMMISSION

In the Matter of )  
NEW YORK POWER AUTHORITY )  
Indian Point 3 Nuclear Power Plant )

Docket No. 50-286

APPLICATION FOR AMENDMENT TO OPERATING LICENSE

The New York Power Authority requests an amendment to the Technical Specifications contained in Appendix A to Facility Operating License DPR-64 for the Indian Point 3 Nuclear Power Plant. This application is filed in accordance with Section 10 CFR 50.90 of the Nuclear Regulatory Commission's regulations.

This application for an amendment to the Indian Point 3 Technical Specifications (TS) proposes to delete the requirement for the Plant Operating Review Committee (PORC) to review the fire protection program and implementing procedures. This requirement, added when the Fire Protection Technical Specifications were relocated in accordance with Generic Letter 88-12, is being removed based on the policies found in Generic Letter 93-07. This proposal will reduce the administrative burden on the committee while making PORC's responsibilities more consistent with the other responsibilities described in Section 6.5.1.6 of the TS. PORC will continue to oversee changes to the Indian Point 3 fire protection program through its review of nuclear safety evaluations.

Attachment I contains the proposed new TS page and Attachment II is the Safety Evaluation for the proposed change.
