Dear Mr. Nazar:

By letter dated October 16, 2009, Florida Power & Light Company (FPL) requested an exemption to permit St. Lucie, Units 1 and 2 to not meet the Title 10 of the *Code of Federal Regulations* (CFR), Sections 26.205(c) and 26.205(d) work hour control requirements when defined conditions (tropical storm force winds and other conditions) are present prior to the declaration of a plant emergency. The request would have the effect of extending the applicability of the existing exemption from declared plant emergencies, 10 CFR 26.207(d).

The U.S. Nuclear Regulatory Commission staff has reviewed your submittal and finds that the additional information contained in the enclosed Request for Additional Information is needed before we can complete the review. 2. The supporting justification to the St. Lucie exemption request states that, "The hurricane staffing procedure provides specific guidance for crew staffing levels and for the process of sequestering storm crews."
