U.S. Nuclear Regulatory Commission  
Washington, DC 20555

SUBJECT: Request for Renewal of US Nuclear Regulatory Commission Certificate of Compliance No. 9204 For the Model 10-160B Shipping Cask

Dear Ms. Ordaz:

EnergySolutions hereby requests renewal of the Certificate of Compliance No. 9204 and that its expiration date be extended to October 31, 2015.

No change to packaging or contents is being requested. EnergySolutions has reviewed the operating section (Chapter 7) and the maintenance and acceptance tests section (Chapter 8) of the 10-160B Safety Analysis Report and no changes to these sections are required as a result of this request.

EnergySolutions requests that the renewal be given the highest possible priority. The 10-160B cask is in use in Canada and endorsements of the renewed certificate by the US DOT and Canadian competent authority must be obtained before the expiration date of the current certificate.

Should you or members of your staff have questions about the responses, please contact Mark Whittaker at (803) 758-1898.

Sincerely,

A handwritten signature in black ink, appearing to read "Patrick L. Paquin".

Patrick L Paquin
