Subject: Indian Point 3 Nuclear Power Plant  
Docket No. 50-286  
License No. DPR-64  
**"1994 NRC Audit of Licensed Operator Requalification Training"**

Dear Mr. Meyer:

As requested during your conversation with Charles Embry of my staff on April 14, 1994, this is to request a change from our agreed upon NRC Annual Licensed Operator Requalification Examination date.

We have scheduled a 5 week Enhanced Licensed Operator Requalification Training course. The course outline is attached. This enhanced training has been developed to enhance the operators' ability to restart Indian Point 3 when the time arrives. We would appreciate your consideration in adjusting your schedule to help us meet this goal.

The five week course began on April 18, 1994. A copy of the schedule is also attached. This situation requires us to shift our annual examination schedule to the following:

- 1) The Annual Operational Simulator examination is scheduled for the last day of our enhanced training program.
- 2) This is scheduled to begin on July 15, 1994 (Friday).
- 3) The JPM portion of the annual exam will be conducted in the following Licensed Operator Training cycle that begins August 22, 1994.

Based on this schedule, we recommend the week of July 31, 1994 for your examination.
