SUBJECT: Indian Point 3 Nuclear Power Plant
Docket No. 50-286
License No. DPR-64
**"Completion of Required Balance of On-The-Job Training for Removal
of Restrictions on Operator Licenses"**

Dear Mr. Meyer:

The individuals listed below have been issued operator licenses that restrict them to cold shutdown operations until they have completed the required balance of their on-the-job training (OJT) at a reactor power level greater than 20%. As described below, the Authority requests permission for these operators to complete their OJT at Consolidated Edison's Indian Point Unit 2.

The licensed operators with this restriction are identified below including the amount of OJT time outstanding.

Mark Caskey	Docket No. 55-60589	License No. SOP-11157	8 Days
Marie Gillman	Docket No. 55-11161	License No. SOP-11161	1 Day
John Wheeler	Docket No. 55-21460	License No. SOP-11163	4 Days

A telephone conversation with you on June 27, 1994 discussed this matter and the possibility of these individuals completing their required OJT at Indian Point Unit 2. The Authority believes that the similarity in plant configuration and operation between Indian Point Units 2 and 3 will afford meaningful completion of the balance of the OJT requirements for these individuals. Removal of the restrictions on the individuals' operator licenses will permit greater flexibility in supporting plant operations during plant restart.
