Subject: Indian Point 3 Nuclear Power Plant
Docket No. 50-286
License No. DPR-64
Removal of Restriction From Operator License

Reference: NYPA letter (IPN-96-037), R. J. Barrett to the NRC, dated March 22, 1996, "Submittal of Certified Operator License Applications."

Dear Mr. Martin:

The New York Power Authority (NYPA) requests the following operator license to be amended to allow the operator to direct the licensed activities of licensed operators and to manipulate all controls of Indian Point Unit 3 during all modes of operations (hot license):

<u>Name</u>	<u>Docket No.</u>	<u>License No.</u>
Thomas N. McKee	55-61928	SOP-11317

A license was issued to this operator on May 10, 1996, with restrictions to cold shutdown and refueling modes of reactor operation only. The restrictions are a result of waivers provided by the referenced letter. As requested by his license, NYPA hereby notifies you that this operator has satisfactorily completed the training requirement for a hot license by observing plant operations at greater than 20 percent power (6 weeks as an extra person on shift at plant power levels greater than 20 percent).
