June 11, 1996

Mr. Robert J. Barrett
Plant Manager
New York Power Authority
Indian Point 3 Nuclear Power Plant
Post Office Box 215
Buchanan, NY 10511

SUBJECT: EXAMINATION REPORT NO. 50-286/96-06

Dear Mr. Barrett:

During the week of April 15-18, 1996, the NRC administered initial examinations to four employees of your company who had applied for licenses to operate the Indian Point Nuclear Power Plant, Unit 3. These examinations evaluated knowledge and abilities important to safety and were conducted in accordance with NUREG-1021, "Operator Licensing Examiner Standards," Revision 7. Generic findings were discussed with Mr. Salmon and other members of your staff at the exit meeting on April 18, 1996.

The results of the examinations were that the four senior reactor operator candidates passed all three sections of the examination. All four of these candidates, however, did not meet all training requirements and were issued licenses restricted to cold shutdown or refueling conditions. Once the requirements of NUREG-1021, Revision 7, Supplement 1, ES-202, E.2.a(4) have been satisfied and documentation, in writing, forwarded to Region I, an amended license will be issued for all modes of operation.

If you have any questions, please contact me at 610-337-5211, or by E-mail at GWM@NRC.GOV.

Sincerely,

(original signed by)

Glenn W. Meyer, Chief
Operator Licensing and
Human Performance Branch
Division of Reactor Safety
