Re: Control # 318808

Dear Mr. Macatangay:

This is to verify that the portable gauge service training provided to Michigan DOT employees, Adam Strong and Justin Foster, on January 25-28, 2010 was generally applicable to all 3400 series gauge models. The training covered gauge safety inspection, disassembly, preventive maintenance, troubleshooting, electronic testing, and gauge calibration. ALARA practices while performing service activities were covered. If you have any further questions about the training, please feel free to contact Eric Hayes at 919-485-2246.

Sincerely,

Stephen A. Browne  
Manager, Radiation Safety
