Mr. Don Shaw
Licensing Manager
Transnuclear, Inc.
7135 Minstrel Way, Ste. 300
Columbia, MD 21045

SUBJECT: SCHEDULE FOR "RESTART" REVIEW OF AMENDMENT 11 TO CERTIFICATE OF COMPLIANCE NO. 1004 FOR THE STANDARDIZED NUHOMS® SYSTEM

Dear Mr. Shaw:

We received your letter of August 14, 2009, transmitting Transnuclear, Inc.'s (TN's) responses to the second request for additional information (RAI) for Amendment 11, as supplemented on November 20, 2009. We have determined, based on your responses to RAI #2, and given the significant change in direction for this amendment, that an additional round of RAIs is necessary. Given the change in direction for this system (described in the April 16, 2009, and June 25, 2009, public meetings; summarized in ML091490353 and ML092180022), we have officially restarted the review, rather than continuing the existing review. This, and future communications will be indicated with "Restart" in the subject line. We have developed a new Restart review schedule, as follows:

ACTION	SCHEDULED DATE
Request for Additional Information, Restart Round #1	2/19/10
Response to Restart RAI #1	3/19/10
Complete Safety Evaluation Report, Draft Certificate of Compliance and Draft Technical Specifications; assumes no Restart Round #2 RAIs	6/12/10

If you have any questions regarding this letter, please contact me at (301) 492-3371.

Sincerely,

/RA/

B. Jennifer Davis, Sr. Project Manager
Licensing Branch
Division of Spent Fuel Storage and Transportation
Office of Nuclear Material Safety
and Safeguards
