UNITED STATES  
NUCLEAR REGULATORY COMMISSION  
REGION I  
631 PARK AVENUE  
KING OF PRUSSIA, PENNSYLVANIA 19406

JAN 18 1980

Docket Nos. 50-03  
50-247

Consolidated Edison Company of  
New York, Inc.  
ATTN: Mr. W. J. Cahill, Jr.  
Vice President  
4 Irving Place  
New York, New York 10003

Gentlemen:

This refers to the letter dated December 7, 1979 from Victor Stello, Jr., Director, Office of Inspection and Enforcement to Mr. W. J. Cahill, Jr. regarding the recently amended NRC regulations requiring, in part, licensees to provide office space as part of the Resident Inspection Program. As a result of the request to the NRC, President Carter, in his response to the recommendations of the President's Commission on the Accident at Three Mile Island, the NRC plans to accelerate the implementation of the resident inspection program.

The Power Authority of the State of New York has been providing office space at the Indian Point Unit 3 facility for the resident inspector currently assigned to the Indian Point site (Unit Nos. 1, 2 and 3), however, it is intended that a separate office be established for the inspectors assigned to your site. As a result of this change in plans it is necessary to request a response from you with regard to your plans for providing the office space for the resident NRC staff.

It is now expected that the first resident will assume this new duty station at your facility by April 30, 1980. It is planned that all resident inspectors will be onsite by June 7, 1980. As a result of this change in schedule you are requested to inform this office in writing by January 31, 1980 of your plans to accommodate the resident NRC staff at your facility.

Should you have any questions or concerns regarding this matter please feel free to contact me.

Sincerely,

*Boyce H. Grier*  
Boyce H. Grier
