U.S. Nuclear Regulatory Commission
Washington, DC 20555-0001

Subject: Duke Energy Carolinas, LLC
William States Lee III Nuclear Station - Docket Nos. 52-018 and 52-019
AP1000 Combined License Application for the William States Lee III
Nuclear Station Units 1 and 2
Summary Identification of Concurrence with Standard Content RAIs
Ltr# WLG2010.02-05

- Reference: (1) Letter from Bryan Dolan to the NRC, dated May 22, 2009, "Summary Identification of Concurrence with Standard Content RAIs" (ML091470055)
- (2) Letter from Andrea L. Sterdis (TVA) to NRC, dated February 20, 2009, "Response to Request for Additional Information – Site Chemicals" (ML090510561)

Duke Energy (Duke) identified the RAI responses containing standard content, and endorsed them as being applicable to the William States Lee III Nuclear Station Units 1 and 2 in the attachments to Reference 1. These attachments include the RAI responses submitted by Tennessee Valley Authority (TVA) as of March 31, 2009. More specifically, Duke endorsed the "STANDARD" portions of the TVA ID# 2223 (response included as an enclosure to Reference 2). Subsequently, it was determined that the standard portions are not applicable to the William States Lee Units. Therefore, Duke is withdrawing endorsement of this RAI response. A William States Lee site specific response will be submitted in a future supplemental response.

If you have any questions or need any additional information, please contact Peter S. Hastings, Nuclear Plant Development Licensing Manager, at 980-373-7820.
