Gentlemen,

It is incredible that we who live a mile from the Indian Point Nuclear Plants are being ignored as far as an Evacuation Plan!! You are treating this problem as if it were no problem!

In the event of an accident or an earthquake where do we go? which roads to travel? Do we go North, East, West, which way is the wind blowing and who directs the public.

Do we (20,000 in Beekskill, 50,000 people in Cortlandt) try to cross the Bear Mountain Bridge via the narrow, 2 lane winding road around the mountain? Do we try the two lane major Route 9 North? To Conn. cross county on narrow roads which always a tedious route? You tell us!

We need a PLAN!!
Have you no compassion at all?

If you won't close the PLANTS as they should be then at least do all in your power to protect us.

Sincerely,
(Mr + Mrs) Dedon + Helene Farrey
