Mr. John Ahearne, Chairman  
U.S. Nuclear Regulatory Commission  
Washington, D.C. 20555

910

Dear Mr. Ahearne:

The decisions made early in February by Harold Denton, Director of Nuclear Reactor Regulation concerning Indian Point do not deal with the significant risks raised by the Union of Concerned Scientists' petition. The citizens of our area remain as unprotected as before in the event of a major accident at Indian Point. These plants should be shut down until those risks are dealt with effectively.

Very truly yours,  
Janet Sonnenfeld
