Dear Chairman,

I urge you to take action
and close Indian Point Nuclear Plant.
I am concerned because unmaintained safety
condition and poor construction. The
New York Times quoted a plant representative
who said they were going to up safety
conditions ten times because the plant
was considered ten times more dangerous
than any other plant in the United
States. Millions of people are in the
radius of this nuclear plant. Their health
and welfare are threatened as long as this
poorly managed plant is allowed to
operate. Please take immediate action.
Thank you.

Sincerely, 8005010645
Maura N. Haslett
