NRC Commissioners
1717 H Street
Washington, D.C. 20555

Gentlemen,

We, the undersigned, are responding to the Nuclear Regulatory Commission's request for comment on the Denton denial of the Union of Concerned Scientists' petition which called for the closing of the reactors at Indian Point while the commission determined whether the site is suitable.

Believing that the reactors represent a clear and present danger to the people in the surrounding counties, we ask the NRC to deny Denton's decision. Furthermore, we would like an atomic safety and appeals board established to gather data on the questions raised by the Union of Concerned Scientists.
