Re: Indian Point Unit No. 2
Docket No. 50-247

Document Control Desk
US Nuclear Regulatory Commission
Mail Station P1-137
Washington, DC 20555

SUBJECT: Proposed Amendment to Technical Specification
Regarding Snubbers (TAC No. M84991)

By letter dated November 12, 1992, we transmitted an "Application for Amendment to Operating License" for the Indian Point Unit No. 2 Technical Specifications. The proposed changes involved the revision of the schedule for the visual inspection of snubbers in accordance with Generic Letter 90-09 "Alternative Requirements for Snubber Visual Inspection Intervals and Corrective Actions". The pages from Technical Specification Section 4.12 with the proposed changes were contained in Attachment A to the November 12, 1992 letter.

At the time of our November 12, 1992 application another application affecting Technical Specification Section 4.12 was also pending. The prior application was sought in letters dated August 7, 1992 and January 5, 1993. We understand that NRC staff is readying Amendment no. 160 for issuance, which will implement the earlier request. Accordingly, it is necessary to modify our pending November 12, 1992 application to reflect the issuance of Amendment No. 160. Attachment A to this letter reconciles the proposed changes submitted in the November 12, 1992 letter with the page changes which are to be contained in Amendment No. 160. The safety assessment submitted in connection with the November 12, 1992 application is not affected.

Should you or your staff have any questions regarding this matter, please contact Mr. Charles W. Jackson, Manager, Nuclear Safety and Licensing.

Very truly yours,

Attachment
