Washington, DC 20555

SUBJECT: Supplemental Information to Technical  
Specification Amendment Request Pursuant to  
Generic Letter 88-16

Transmitted herewith is a revised version of Attachment A to our September 29, 1993 submittal, entitled "Proposed Amendment to Technical Specifications Pursuant to Generic Letter 88-16". This revision involves changes that are purely administrative in nature. Specifically, on proposed Technical Specification pages 6-22 and 6-23, Sections 6.9.1.9 (a) through (e) have been expanded to footnote each analytical method with a reference to the section of Technical Specifications for which it applies. Additionally, WCAP 9220-P-A Rev. 1 and WCAP 9561-P-A, ADD. 3, Rev. 1 have been deleted because WCAP-10266-P-A Rev. 2 delineates the methodology for determining the Height Dependent Heat Flux Hot Channel Factor and references these WCAPs.

Should you have any questions regarding this matter, please contact Mr. Charles W. Jackson, Manager, Nuclear Safety and Licensing.

Very truly yours,
