Re: Indian Point Unit No. 2
Docket No. 50-247

Document Control Desk
US Nuclear Regulatory Commission
Mail Station P1-137
Washington, DC 20555

SUBJECT: Proposed Change in Technical Specification
Instrument Setpoint Limit

Transmitted herewith are the original and two (2) copies of an "Application for Amendment to the Operating License". This application requests amendment of the Con Edison Indian Point Unit No. 2 Technical Specifications pertaining to instrument setpoint limits.

This application for amendment to the Indian Point 2 Technical Specifications seeks to revise the setpoint limit for the High Containment Pressure Engineered Safety Feature instrument channel from 2 psig to 5 psig. This submittal includes a safety assessment supporting the amendment request together with the proposed revised Technical Specification page.

This amendment request has been reviewed and accepted by the Station Nuclear Safety Committee (SNSC) and the Nuclear Facilities Safety Committee (NFSC).

Should there be any questions with regard to this matter, please contact Mr. Charles W. Jackson, Manager, Nuclear Safety and Licensing. In accordance with 10 CFR 50.91, a copy of this specification and the associated attachments are being submitted to the designated New York State Official.

Very truly yours,

9405170083 940426
