Re: Indian Point Unit No. 2
Docket No. 50-247

Document Control Desk
US Nuclear Regulatory Commission
Mail Station P1-137
Washington, DC 20555

SUBJECT: Proposed Changes in Technical Specification
Surveillance Intervals to Accommodate a 24 Month
Fuel Cycle

In our letter of April 29, 1994 we referred to an internal review and audit of the work performed under the subject project. This review has identified that Technical Specification 4.20A should have been revised to reflect a 24 month (+25%) surveillance interval when the "Applicability" requirement was revised by our license amendment request of November 24, 1992. A revised page is enclosed.

Should you have any questions regarding this matter, please contact Mr. Charles W. Jackson, Manager, Nuclear Safety and Licensing.

Very truly yours,

cc: Mr. Thomas T. Martin
