Re: Indian Point Unit No. 2
Docket No. 50-247

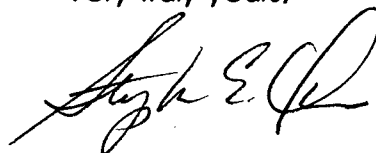

Document Control Desk
US Nuclear Regulatory Commission
Mail Station P1-137
Washington, DC 20555

SUBJECT: Proposed Changes in Technical Specification
Surveillance Intervals to Accommodate a 24 Month
Fuel Cycle

In a Con Edison letter dated February 18, 1994 as supplemented
by Con Edison letter dated June 3, 1994, we transmitted an
Application for Amendment to the Operating License for the
subject proposed Technical Specification Changes.

The purpose of this letter is to supplement the aforementioned
submittal with the attached Technical Specification Table 4.10-2,
page 1 of 2. This page was included in Con Edison letter dated
August 5, 1994 but was later deleted from that submittal so that all
the Technical Specifications changes for the Refueling Water
Storage Tank would be proposed in the February 18, 1994
submittal.

Very truly yours,

120
