See attached for your review.

On May 8 and May 11, 2009, the New Jersey Department of Environmental Protection (NJDEP) held two outreach meetings in Hamilton, New Jersey, with current NRC licensees regarding NJDEP's plans for assuming Agreement State status later this year. Approximately 100 licensee representatives attended each meeting. At the request of NJDEP, NRC staff supported the meetings to answer licensee questions related to the transition of regulatory authority from NRC to New Jersey.
