Mr. Thomas Dragoun
U. S. Nuclear Regulatory Commission
Region I
475 Allendale Road
King of Prussia, PA 19406

Dear Mr. Dragoun:

SUBJECT: Cintichem Interim Survey Report for Interior Reactor Building,
Pump Room, and Access Tunnel Areas on Site

Sections 1 - 5 of the Cintichem, Inc. decommissioning project, "Final Status Survey Plan and Report" were submitted on December 5, 1994 followed by section 6, "Interim Survey Report for HUT and 5K Tank Areas on Site" submitted on January 26, 1995. The enclosed report of the subject survey results, sections 7 and 8, is hereby submitted as a continuation of the Cintichem "Final Survey Plan and Report".

Please note that section 8.15 and soil results from the tunnel and reactor floors are not included in this submittal. We are waiting for crane replacement parts and strontium data, so we have decided to ship the bulk of the survey to get ORISE started with their review and will send the remaining data in about a week.

We request that these survey results be reviewed by NRC and ORISE as early as possible so that a confirmation survey can be scheduled and conducted by ORISE on short notice. Currently these interim survey areas are secured to prevent access and to assure that the as-surveyed condition of these areas will not change.

Thank you for your cooperation. Please let me know as soon as possible if you require additional information on these surveys.

Very truly yours,

J. J. McGovern
