Mr. Thomas Dragoun
U. S. Nuclear Regulatory Commission
Region 1 Office
475 Allendale Road
King of Prussia, PA 19406

Dear Mr. Dragoun:

SUBJECT: Cintichem Interim Survey Report for HUT and 5K Tank
Areas on Site

The enclosed report of the subject survey results is hereby submitted as planned per Section 5 of the Cintichem, Inc. decommissioning project "Final Status Survey Plan and Report" that was submitted on December 5, 1994. These interim survey results comprise Section 6 of this final survey plan and report document.

We request that these survey results be reviewed by NRC and ORISE as early as possible so that a confirmation survey can be scheduled and conducted by ORISE on short notice when weather conditions permit in the near future. Currently there is a sparse, thin layer of snow or ice covering some of the survey areas. As soon as the weather moderates to allow confirmation measurements and sampling to be done we would like to be able to schedule ORISE personnel in on relatively short notice for this purpose.

Currently these interim survey areas are secured to prevent access and to assure that the as-surveyed condition of these areas will not change. We will need to backfill the Hold-up-Tank excavation in order to finish some remaining tasks on the project. We are requesting that ORISE be ready, in a stand-by status, to do the confirmation surveys at the earliest opportunity to avoid any delay in the completion of these final decontamination tasks.

Thank you for your cooperation. Please let me know as soon as possible if you require additional information on these surveys.

Very truly yours,

J. J. McGovern
President/Plant Manager
