December 5, 1994

Mr. T. Dragoun
U. S. Nuclear Regulatory Commission
Region I
475 Allendale Road
King of Prussia, PA 19406

Dear Mr. Dragoun:

SUBJECT: Cintichem Final Survey Plan

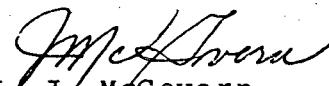

The enclosed Cintichem decommissioning "Final Status Survey Plan and Report" has been revised to incorporate the supplemental information suggested by the comments that we received on the September 20, 1994 draft.

Section 5 of the Plan pertains to the interim surveys of the excavations for the Hold-up Tank and the 5K Tanks and the respective associated peripheral areas. These interim surveys are necessary to assure that remedial operations in these areas have been completed successfully so that the excavations can be backfilled and the final decommissioning work in these areas can progress.

The interim surveys of the 5K Tank excavation has been scheduled for mid-December. The Cintichem survey data for this area will be forwarded under separate cover within a few days. Our survey data for the Hold-up Tank excavation will be forthcoming within a few weeks. Unexpected delays in the completion of this survey occurred when some isolated hot spots were encountered.

As we mentioned when the draft survey plan was distributed, we intend to use this document as a working document for both planning and reporting purposes. It will be supplemented as either interim or final surveys are performed.

Very truly yours,

J. J. McGovern
President/Plant Manager

JJMcG/bjc
