December 3, 1997

US Nuclear Regulatory Commission  
 Att: Document Control Desk  
 Washington, DC 20555  
 Gentlemen:

Subj. Special Nuclear Materials License 639, Amendment No. 8, (Docket 70-687)

Condition H of the subject license requires that the decommissioning of the Cintichem facilities must be completed by Dec. 31, 1997. All of the remediation work that was required to satisfy the acceptance criteria that were stipulated in the Decommissioning Plan and in the License has been completed. The final survey reports have been submitted and confirmation surveys have been completed. We are anticipating the license termination in the near future but we can't predict the actual date of termination.

Therefore, in the event the license is not terminated before the date stipulated in Condition H, we are requesting an indefinite extension until the license is terminated.

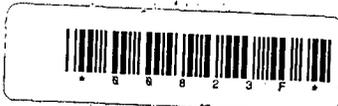

Very truly yours

*J. McGovern*
