Name of Participant(s): Chris Oliverio, Maint. Assistant; Randolph C. Ragland, Jr., NRC Region I

Telephone No. 304-368-2289

Subject: SFK Pulp Recycling U.S., Inc. License Amendment Request

(NOTE: This will be used as the Documents Title in ADAMS)

I informed Mr. Oliverio that on March 2, 2010, that I spoke with Craig Caris, RSO, Ronan Engineering Company and he indicated that the two SA-1 Gamma Gauges and the one Model SA-8 Source Holder that SFK Pulp possesses were originally issued for possession under a Specific License (47-25327-01), and although these units can be distributed under a General License, the installed configuration above a conveyor belt does not prevent physical access into the radiation beam and those types of configurations require use under a Specific License. I informed him that because the sources are authorized by the specific license, that he can take action to terminate his General License. I also informed him that NRC has established a policy to require a total possession limit on all specific licenses. Accordingly, he should submit a License Amendment Request to NRC Region I in order to specify a total possession limit and he should include "License Amendment Request, License No. 47-25327-01 and Docket No. 03033817" in the subject line and that he can fax the request to 610-337-5269.

Action Required: SFK Pulp Recycling will submit a license amendment request to NRC Region I that will include a total possession limit.
