The Nuclear Regulatory Commission (NRC) conducted a routine unannounced inspection of your facility's material control and accounting safeguards program on November 14-15, 1990. The scope and results of the inspection are summarized in the Inspection Report Summary (Enclosure 1). Areas examined during the inspection are described in the Inspection Report Details (Enclosure 2).

The inspection consisted of selective examination of procedures and representative records, interviews with personnel, and observations of activities in progress. At the conclusion of the inspection, the findings were discussed with you and members of your staff.

Within the scope of this inspection, no violations or deviations were identified. However, two items require inspector follow-up, i.e., documentation of certain measurement control data and documentation of the review and approval of the Measurement Quality Assurance Manual.

Under the provisions of Section 2.790(d), reports containing information related to a licensee's material control and accounting program are exempt from public disclosure. Accordingly, the Inspection Report Details (Enclosure 2) will not be placed in the Public Document Room.

Should you have any questions concerning this letter, please contact us.

Sincerely,
Original Signed by
Theodore S. Sherr

Theodore S. Sherr, Chief
Domestic Safeguards Branch
Division of Safeguards and
Transportation, NMSS
