Gentlemen:

Pursuant to 10 CFR Part 70, Special Nuclear Material License No. SNM-639 is hereby amended to authorize a change in the procedures for use of Raschig rings in the processing of cell waste, in accordance with your application dated August 20, 1985. Accordingly, revised page I.4-4 of your Consolidated Application is hereby incorporated into the license conditions and Appendix A of your license.

Conditions Section of Application:

<u>Page No.</u>	<u>Old Date</u>	<u>New Date</u>
I.4-4	08/07/84	06/24/85

All other conditions of the license shall remain the same.

We have evaluated the potential for an increase in environmental impact of the change in procedures for use of Raschig rings in accordance with this amendment and have determined that the actions authorized by the amendment will not result in any change in environmental impact. Having made this determination, we have concluded that the amendment involves an action that is covered by the categorical exclusion of 10 CFR § 51.22(c)(14)(xiii), and that an environmental assessment need not be prepared in connection with the issuance of this amendment.

Revised pages 1 and 2 to your license and revised Appendix A are attached. Item 9 on page 2 and Appendix A of the license incorporate this amendment, and page 1 of the license reflects the amendment issued July 2, 1985, authorizing the transfer of the license to Cintichem, Inc.

For your information a copy of the Safety Evaluation Report prepared in support of this amendment is enclosed.
