

VA SRM

274.c. – has 4 things that are retained by NRC – construction and operation of power plants, import/export, disposal into ocean/see, disposal of other as the Commission determines by regulation/order.

With this, there is a conditional paragraph – in summary: notwithstanding the things NRC retains, we could by rule, regulation, or order require the manufacturer, processor or producer of any equipment, device, commodity or other product containing source, BPM or special nuclear material to not transfer except pursuant to a license issued by NRC.

Part 150.15(a)(6) is the paragraph in the regulation that implements this from the Act. Currently, exempt distribution licensing is the only thing implemented under this.
