

Daily Note

On September 14, NRC staff was informed by New Jersey (NJ) staff within the Bureau of Environmental Radiation that Shieldalloy Metallurgical Corporation (SMC) has filed an Appeal with the New Jersey Judiciary Superior Court – Appellate Division. SMC is appealing NJ's radiation protection regulations and specifically claiming that the license termination regulations are invalid because they were not adopted in accordance with the requirements of the State Administrative Procedures Act. Staff reviewed NJ's radiation protection regulations as part of its Agreement State application and found the regulations to be compatible with NRC regulations and adequate to protect public health and safety.
