

L&R:IB:NB (29-6033-1)

December 31, 1959

Mr. G. L. Stukenbroeker
National Lead Company
Atlantic Branch
1050 State Street
Post Office Box 831
Perth Amboy, New Jersey

Dear Mr. Stukenbroeker:

Enclosed is License No. 29-6033-1 issued against your application dated December 10, 1959.

Please note that Condition 12 requires that the source be used by or under the direct personal supervision of yourself or Mr. J. M. Nees. Since the other persons whom you have listed in the application do not have actual handling experience, their names have been omitted from the license. At such time as these people received training we would like to be made aware of it and a statement as to how you determine their competency to independently use the sources.

We require that a physical radiation survey be performed after each exposure to insure that the source be returned to the storage condition. This requirement is a condition of your license and should be made a part of your written procedures to personnel.

Very truly yours,

Nathan Bassin
