Sept/Oct 2009 for NJ to get statute

Agreement state selects what license type they will take

NJ says they will take Part 4 license which means Shieldalloy

SMC feels they are confident. They believe it will be successful. T

NJ have to have compatibility with NRC regulations. NJ compatibility C which can make it more conservative

What happens if DP is approved first & then NJ becomes an agreement state. DP will stand but it will be transferred to NJ jurisdiction

What happens if NJ refuses to accept Shieldalloy under LTC?

Does public have the opportunity to object. There is an opportunity when it goes to the Commission to comment on.
