BJones, OGC	4/1/09	Minor edits; question re: adding a section on decommissioning like the VA SECY. Response: this will be done for the final SECY – different information about number of licensees, enforcement, decommissioning, etc. At that time, staff will provide information regarding these topics, including the transfer of sites undergoing decommissioning that are within the authority of the agreement for NJ (Shieldalloy, but not Stepan Chemical which is 11e(2) material that NJ is not taking)
SCollins, RI	4/3/09	Minor edits
RZimmerman, NSIR	3/31/09	none
JDyer, OCFO	4/2/09	None; question re: resources – how many FTEs/money. Dennis explained that we didn't budget down to resources at the State level. The Region has a certain FTE/dollar budget that is used for support the activities. The critical budget information is that if NJ does not get an Agreement in place by 9/30/09, NRC Region 1 does not have the budget for licensing and inspection, etc., for this number of licensees.

Changes made to Federal Register and Draft Staff Assessment

1. Changes made to staff assessment on staffing – Q.20.a. – New Jersey has interviewed and filled the vacant position. The individual should be on staff as of 4/13/09. Therefore, the information was modified as to the vacant position.
2. Minor change in Federal Register, on page 7, last full paragraph – We deleted the statement regarding NJ staff working with NRC on licensing. They have been working with RI on licensing to date; they are looking at some interaction with the Region on licensing – but nothing is scheduled. The need is more to get familiar with the licenses NJ will be getting.
