U. S. Nuclear Regulatory Commission
Division of Safeguards
Washington, D. C. 20555

Attn: Mr. R. A. Brightsen

Dear Sir:

Reference is made to our letter of 7/14/76 which requested a hearing with regard to condition 6.2 of the MPP 2 amendment to our SNM-639 license.

We understand that the monthly report of MUF as stipulated in 6.2 of MPP 2, will not require a physical inventory at more frequent intervals than the bi-monthly schedule originally proposed and referenced in Section 5.1 of MPP 2. Any MUF which may result from a material balance based on normal in process measurements will be reported during those months when no physical inventory is required.

With this understanding our letter of 7/14/76 is withdrawn.

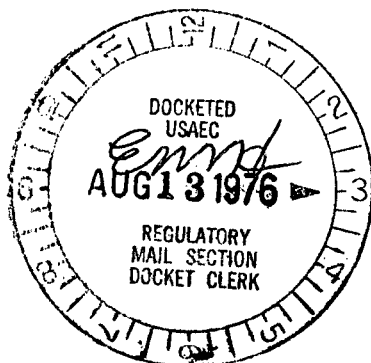

Very truly yours,

James J. McGovern
Manager
Radiochemical Production
