UNION CARBIDE CORPORATION APPLICATION FOR AMENDMENT DATED FEBRUARY 8, 1973

REFERENCES: Initial Nuclear Criticality Safety Review of Subject application by the Technical Support Branch dated May 29, 1973, enclosed.

Mr. J. J. McGovern, Superintendent Nuclear Operations of Union Carbide Corporation, Rick Szrempruch of Technical Support Branch, Robert Dube and Ferman Stubblefield of FFRB met at 3:00 p.m. June 1, 1973 to discuss the additional information that is needed to supplement the subject application. A draft of the reference letter had been phoned to Mr. McGovern on May 23, 1973. He had prepared draft answers to this phone call and wanted our comments prior to preparation of a supplement letter.

The meeting adjourned at 5:15 p.m. with the consensus of opinion that I had not covered all the areas that needed additional information and consequently, there would have been a need for a second request for information.
