Decommissioning Funding Assurance Status Report – 10CFR 50.75

Gentlemen:

In reference (b) Yankee Atomic Electric Company (YAEC) informed the USNRC that the Board of Directors of YAEC had decided to permanently cease operations at the Yankee Rowe Plant and that fuel had been permanently removed from the reactor. In accordance with 10CFR 50.82 the certifications in the letter modified the YAEC license to permanently withdraw YAEC's authority to operate the reactor. In 1993, YAEC commenced decommissioning the power plant. In Reference (c), the NRC amended the YAEC license, releasing most of the formerly licensed land for unrestricted use, shrinking the licensed land to the ISFSI only.

In accordance with the requirements of 10 CFR 50.75, direction provided by the NRC staff on March 5, 2008 and recent RIS 2001-07, Rev 1 regulatory clarification, YEAC hereby, submits its report on the status of decommissioning funding for the year ending December 31, 2009. Attachment 1 provides the requested information.

Attachment 1

NRC Decommissioning Funding Status Report

Yankee Atomic – Yankee Rowe Plant (Status as of 12/31/09)

1. The amount of decommissioning funds estimated to be required pursuant to 10 CFR 50.75 (b) and (c)

\$101.7 million⁽¹⁾

2. The amount accumulated at the end of the calendar year preceding the date of the report for items included in 10 CFR 50.75 (b) and (c)

\$38.9 million⁽²⁾

3. Schedule of the annual amounts remaining to be collected including amounts beyond those required in 10 CFR 50.75 (e)(1)(i)

\$11.8 million⁽³⁾

Years to collect

5 years

4. The assumptions used regarding escalation of the decommissioning cost estimate, rates of earnings on decommissioning funds, and rates of other factors used in funding projections are:

Annual escalation rate

2.5%

⁽¹⁾ Since the original power plant has been decommissioned and the license amended, the only remaining decommissioning as defined by the NRC in 10 CFR 50.75 is decontamination and dismantlement of the ISFSI once the fuel is removed. The Site-Specific Cost Estimate for future costs beyond 2009 is \$101.7 million (in 2009 dollars) and includes the current estimate for spent fuel management costs, i.e. Long-term ISFSI operations through 2022 (\$91.9 million) and D&D of the ISFSI (\$9.8 million).

⁽²⁾ This accrued market value balance includes amounts in the Decommissioning Trust for all decommissioning costs including site restoration and long-term spent fuel storage as well as decommissioning as defined in 10 CFR 50.75. Since the original power plant has been decommissioned and the license amended, the only remaining decommissioning is decontamination and dismantlement of the ISFSI (currently estimated at \$9.8 million of the current market value balance) once the fuel is removed.

⁽³⁾ YAEC revised its annual decommissioning collections rates effective February 1, 2006 continuing through 2014, based on the Settlement Agreement filed at FERC on May 1, 2006 and accepted on July 31, 2006.
