Hello,

Here are 3 more comments on the NJ Agreement application that are now publically available. I've attached them for your convenience - ADAMs has been "acting up" this week.

1. Unknown Citizen, ML091680375; against
2. OAS, ML091680374; supports
3. Loreta Williams, ML091680387; supports

The package ML for Shieldalloy comments is ML091700392 (document 1 - ML091700382 and document 2 - ML091680491). I didn't attach them because of the size. I know you have the 6/11/09 letter - I wasn't sure about the rest but it's information you already have.

I am still waiting to hear about one more comment that was sent to me as a courtesy - it was sent in officially, but I haven't seen it. I've contacted the staff in that area; hopefully I'll hear something on Monday.

The comment period officially ends today; we may still get some comments stragglng in; if they are dated today and we receive them in a timely manner, we need to address them. I suspect that these are all the comments that we will receive.

I hope you had a nice weekend; we'll keep you posted on the status.
