Subject: RE: question from NRC licensee

Agreed, however they will still need a possession license from New Jersey which they will obtain once we transfer their current license (#29-17621-01) to New Jersey.

it appears that this can be done under a general license to export-- <http://www.nrc.gov/reading-rm/doc-collections/cfr/part110/part110-0023.html>

Ladies,

Can either of you help me with an answer to this question?

Thanks,  
Donna

Subject: question from NRC licensee

Donna,

We received this question.

Message: DRG-Int'l is an Export Distributor of Medical Diagnostic kits. We have an NRC lic. #29-17621-01 expiring 31 March 2013, for I125 (Iodine) radioactive tracers.

We distribute outside the USA. The product is bought from USA suppliers from California and Missouri and shipped immediately from our N.J. facility to the customer outside the USA.

Do we still need a New Jersey Licence ?

Regards,

Monika Bouchat

Would this be a license that is split? One for manufacturing and distribution - which would be our license, and one for export, which would be NRC?

Thanks

Jenny
