Dear Ms. Greene:

This is to request amendment of Fenwal's License No. 20-15285-03E to change our name from "Fenwal Incorporated" to "Kidde-Fenwal, Inc." and to provide for our distribution of the Kidde-Fenwal Model CPD705X Smoke Detector. This detector uses a 0.7 uCi Am-241 source, Amersham Model AMM 1001.

In support of this request, we have enclosed our application for a safety evaluation of the Kidde-Fenwal Model CPD705X and amendment of our Registration Certificate No. NR-668-D-101-E. This application was submitted to Mr. Sterling Bell by letter dated November 27, 1991.

The CPD705X will be manufactured by Nohmi Bosai, Ltd. in Japan and distributed in the U.S. by Kidde-Fenwal, Inc. The quality control program at Nohmi Bosai and the quality control program at Kidde-Fenwal combine to ensure our distribution of a high quality product. The respective programs of Nohmi Bosai and Kidde-Fenwal are detailed in our application for safety evaluation and amendment of Registration Certificate No. NR-668-D-101-E.

Perhaps optimistically, we expect to distribute 50,000 units (containing 35 mCi AM-241) in our first full year of marketing the Kidde-Fenwal Model CPD 705X and subsequently 100,000 units (70 mCi Am-241) annually. Our detector is designed for the commercial and industrial market. This market is significantly smaller in number than the market for detectors designed for residential use. We do not expect more than 2,000 units to be warehoused at any time at any location except at Kidde-Fenwal, Ashland, MA.

As required by 10 CFR 170.31.3.H., enclosed with this application for amendment of License No. 20-15285-03E is our check for \$250.00
