

NOV 02 1992

Kidde-Fenwal, Inc.
ATTN: Mr. Robert A. MacNutt
Quality Manager
400 Main Street
Ashland, Massachusetts 01721

Dear Mr. MacNutt:

Enclosed is Amendment No. 02 renewing NRC License No. 20-15285-03E in its entirety.

Please review the enclosed document carefully and be sure that you understand all the conditions. If there are any errors or questions, please contact me so that appropriate corrections and answers can be provided.

Please be advised that you must conduct your program involving radioactive materials in accordance with the conditions specified in your NRC license, representations made in your license application, and other rules, regulations, and orders of the U.S. Nuclear Regulatory Commission, now or hereafter in effect, to include the following:

1. Operate in accordance with NRC regulations in 10 CFR Part 19, "Notices, Instructions, and Reports to Workers: Inspection and Investigations;" 10 CFR Part 20, "Standards for Protections Against Radiation;" and other applicable regulations.
2. Use radioactive material only for the purpose(s) indicated in your license.
3. Notify NRC in writing of any change in mailing address (no fee is required if the location of radioactive material remains the same).
4. Request and obtain appropriate amendments if you plan to change control or ownership of your organization, change locations of distribution of radioactive material, or make any other changes in your program which are contrary to the license conditions or representations made in your license application and any supplemental correspondence with NRC. A license fee may be charged for the amendments if you are not in a fee-exempt category.
5. Submit a complete renewal application with proper fee or termination request at least 30 days before the expiration date on your license. You should receive a reminder notice approximately 90 days before the expiration date. Possession of radioactive material after your license expires is a violation of NRC regulations.

B-69

- 6. Request termination of your license if you plan to permanently discontinue activities involving radioactive material, see 10 CFR 30.36.

You will be periodically inspected by NRC. Failure to conduct your program in compliance with NRC regulations, license conditions, and representations made in your license application and supplemental correspondence with NRC may result in enforcement action(s) against you. This could include issuance of a notice of violation; imposition of a civil penalty; or an order suspending, modifying, or revoking your license as specified in the General Statement of Policy and Procedure for NRC Enforcement Actions, 10 CFR Part 2, Appendix C.

If you have any questions, you may contact me at (301) 504-2686.

Sincerely,

Original signed by:
