Subject: TMI Radioactivity Issue Presentation during the Winter Seminar
Attachments: DRAFT Seminar Agenda-rev2.xls

I spoke with John White this morning and he and Diane agreed to put a 20 minute presentation together concerning the recent TMI radioactivity issue.

Attached is the updated draft copy of the winter seminar agenda that is scheduled to be approved and released to all of Region I later this afternoon.

Just for clarification: John/Diane - your presentation will be during BREAKOUT SESSION #1 on Tuesday, December 8, 2009. The Breakout session is scheduled for 1 hr in the MCR. Dave Lew will speak first for about 10 min on the New DRP policy about containment and confined space entry. Your presentation on the TMI radioactivity issue will be second for about 20 min. Justin Heinly will speak last about the Seabrook EDG Failure and Inspection Follow-up for about 15 min.

Thanks you for your assistance. If you are going to use slides for your presentations please get them to me by Monday, December 7, 2009.

If you need any help please let me know.
