**Cc:** ComanchePeakCOL Resource; Takacs, Michael  
**Subject:** Comanche Peak RCOL Section 13.04 - RAI Number 151  
**Attachments:** RAI 4454 (RAI 151).doc

The NRC staff has identified that additional information is needed to continue its review of the combined license application. The NRC staff's request for additional information (RAI) is contained in the attachment. Luminant is requested to inform the NRC staff if a conference call is needed.

The response to this RAI is due within 35 calendar days of March 10, 2010.

Note: If changes are needed to the safety analysis report, the NRC staff requests that the RAI response include the proposed changes.

thanks,

Stephen Monarque

RAI Number 151

3/10/2010

Comanche Peak Units 3 and 4  
Luminant Generation Company, LLC.  
Docket No. 52-034 and 52-035  
SRP Section: 13.04 - Operational Programs  
Application Section: 13.4

QUESTIONS for Component Integrity, Performance, and Testing Branch 1 (AP1000/EPR Projects)  
(CIB1)

13.04-4

Please modify STD COL 13.4(1) of the Comanche Peak Units 3 and 4 COL, Part 2 FSAR to clarify that the preservice and inservice parts of the Steam Generator Program are included as operational programs in the application. For example, list FSAR Section 5.4.2.5 under items 1 and 4 in Table 13.4-201 ("Operational Programs Required by NRC Regulation and Program Implementation"). According to NUREG-0800, Standard Review Plan, Section 5.4.2.2, the Steam Generator Program is an operational program that should be fully described, with implementation milestones listed in the appropriate table in Chapter 13 of the FSAR. SRP Section 5.4.2.2 also discusses the need for a steam generator program to ensure all tubes are inspected before being placed into service. Since preservice inspection of steam generator tubes is not described in the technical specifications, it is appropriate to include it in the list of operational programs.
